Lecture 6

ME599-004: Data-Driven Methods for Control Systems

Winter 2024

Instructor: Uduak (*Who-dwak*) Inyang-Udoh

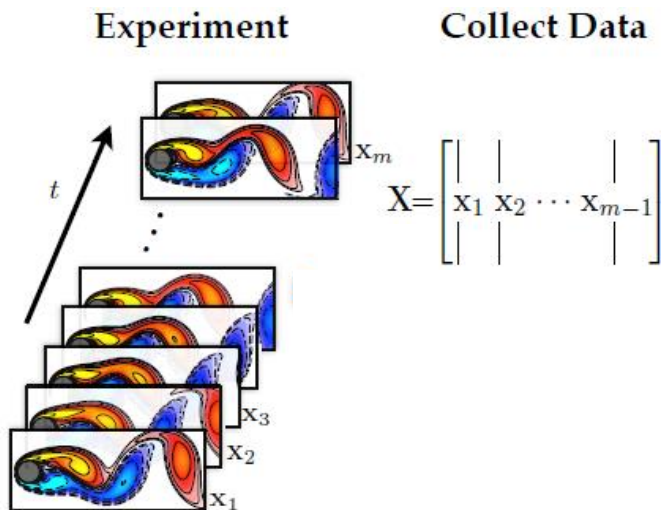

Classification

Motivation

High dimensionality is a challenge in processing data.

- Dynamic System Identification
- Image compression
- Classification

Dogs v.Cats

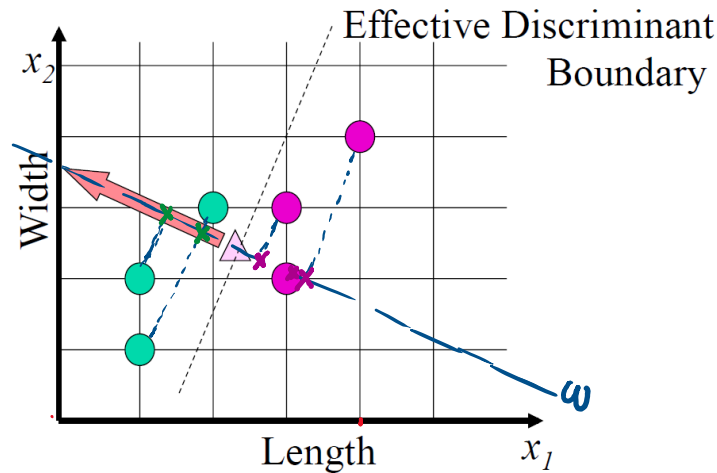

Recall Dimensionality Reduction (PCA) Example

- $x \in R^2$

Now consider Linear Discriminant Analysis

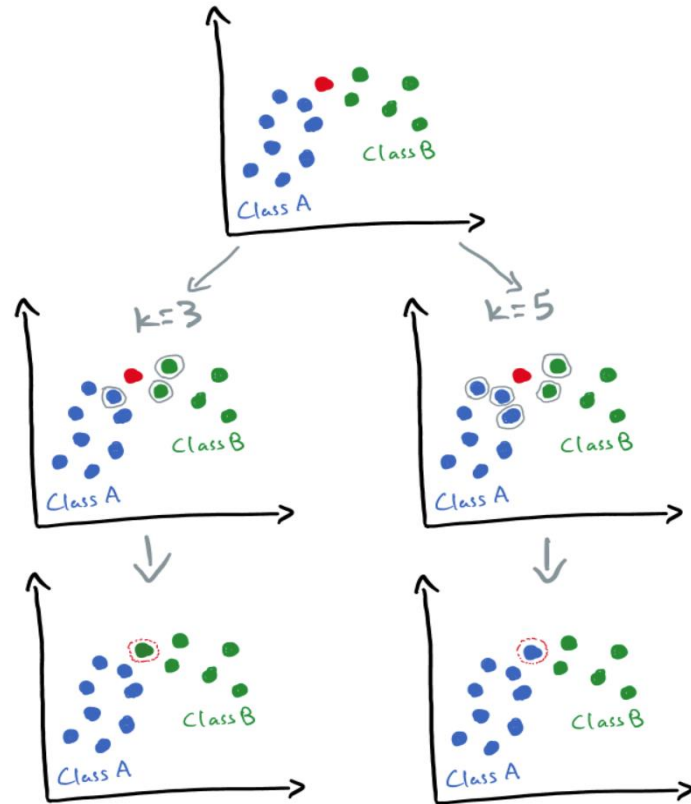

- $x \in \mathbb{R}^2$

Projection onto w : $y_i = w^T x_i \quad i=1, \dots, 6$

K-NN Classification

MATLAB

`knnsearch`
